| Office Action Summary | Application No. 10/786,416 | Applicant(s) BAYCHAR, | |
| | Examiner Elizabeth M. Cole | Art Unit 1794 | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/5/06.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-5, 8, 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nebeker, U.S. Patent NO. 5,566,395 in view of Ogden, U.S. Patent NO. 5,727,336 as set forth in the previous action.
3. Claims 6,9, 11-12, are rejected under 35 U.S.C. 103(a) as being unpatentable over Nebeker in view of Ogden and Bryant et al, U.S. Patent No. 6,366,801 as set forth in the previous action.
4. Applicant's arguments filed 10/5/06 have been fully considered but they are not persuasive. Applicant argues that the spacing layers of Nebeker are disclosed as providing increased thickness rather than increased insulation and therefore do not correspond to the claimed insulating layer. However, the thickness or buildup layer or layers of Nebeker will necessarily provide some degree of insulation. The instant claims do not recite either a degree of insulation provided or otherwise recite a particular structure of the insulation layer. Therefore, since the layers of Nebeker will provide some increased insulation to the overall material they meet the claimed insulation layer, even though their purpose in Nebeker is to provide spacing rather than insulation.
5. Applicant argues that Nebeker does not teach the claimed structure as recited in the amended claims, since Nebeker does not teach an open cell foam inserted inside the internal structure of a nonwoven. However, the instant claims recite "a thermal nonwoven composite formed from a nonwoven to which open cell foam material is

added", (claim 1) and "a thermal nonwoven composite which includes an open-cell foam material" (claim 11). Neither claim recites that the open cell foam is inserted inside the internal structure of a nonwoven but instead recites a composite of a nonwoven and open cell foam. The combination of Ogden and Nebeker teaches the claimed composite of nonwoven and open cell foam.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
